

VITAL TRANSPORTATION CORP.

About Us

Vital Transportation Corp. is an asset based transportation and logistics provider serving the NY and NJ port region and major interstate corridors. Since 2011, the company has built a strong reputation for dependable drayage, over the road trucking, intermodal support, LTL service, and warehouse backed distribution. Vital combines the operational strength of a scaled carrier with the personal attention of a privately run logistics partner. Customers work directly with experienced professionals who understand their freight, communicate clearly, and manage shipments with real accountability. The company focuses on relationships, responsiveness, and consistent follow through across every stage of the supply chain.

Company Overview

Vital Transportation Corp. operates from a centrally located facility in Piscataway, New Jersey, supporting importers, exporters, manufacturers, retailers, and distribution networks throughout the region. The company provides port drayage, OTR trucking, LTL service, transloading, and warehouse solutions designed to streamline container flow and improve supply chain efficiency. Vital maintains all required safety and compliance certifications and offers flexible capacity during both steady and peak seasons. The company presents a modern, professional identity built on clarity, transparency, and operational discipline.

Core Services

(Let this serve as the starting point for the Solutions section. We can build out each item with additional text later. I want to model the layout after a page I previously developed for [Wen-Parker](#), using a similar structure for images and supporting write-ups. The content can be expanded over time, but this format gives us a strong foundation to work from.

We want to use real-life pictures to demonstrate real world capability in action. There will be small write ups under each one of these headings. Perhaps a few can be combined)

Port Drayage and Container Transport

- Import and export container movement

- Terminal retrieval and returns
- Overweight and specialized container handling
- Port to warehouse and port to customer delivery
- Real time dispatch visibility and tracking
- Drayage support for transload and cross dock programs

Intermodal and Rail Connected Services

- Rail ramp drayage
- Container repositioning
- Coordination with Class I rail carriers
- Rail to truck distribution support
- Intermodal integration for long haul freight

Over the Road Truckload (OTR)

- Regional and long haul dry van service
- Temperature controlled truckload
- Expedited and time critical shipments
- Multi stop distribution routes
- Dedicated fleet programs for recurring freight

LTL and Partial Trucking

- Scheduled LTL service for palletized freight
- Partial truckload options for cost efficiency
- Retail and distribution center deliveries
- Appointment based LTL routing
- Consolidation and deconsolidation programs

Warehouse and Distribution Solutions

- Short term and long term storage
- Cross docking and transloading
- Palletizing, labeling, and value added services
- Freight consolidation and deconsolidation
- Inventory staging for retail and e commerce
- Transload to truck programs for importers

Hazardous Materials Transport

- Certified HazMat drivers
- Compliant handling and documentation
- Secure routing and chain of custody

Final Mile and Local Delivery

- Retail and commercial final mile
- Liftgate equipped delivery
- Appointment based delivery windows

Value Added Logistics Support

- Appointment scheduling and dock coordination
- Customs related documentation assistance
- Surge and overflow freight coverage
- Tailored communication and shipment oversight
- Customer specific SOP development

Fleet and Equipment Capabilities

- Company owned tractors and chassis
 - GPS enabled fleet monitoring
 - Specialized equipment for heavy or non standard loads
 - Secure yard and warehouse infrastructure
-

Locations *(This could be placed in the footer across all pages, or we can position the phone number at the top of every page for maximum visibility, we can either list them out (locations) or choose to do a map graphic depending on scope.*

Headquarters and Warehouse

91 New England Ave
Piscataway, NJ 08854

Primary Operating Region (This can be adjusted to say US Domestic)

- New Jersey
 - New York
 - NY and NJ Ports
 - Regional interstate lanes
-

Why is it Vital?

Vital Transportation is a modern, people focused logistics partner built on clarity, professionalism, and dependable execution. Customers work directly with knowledgeable team members who understand their freight and communicate with precision. This relationship driven approach provides direct access to decision makers and a level of responsiveness that reflects a disciplined, contemporary brand. Companies choose Vital for consistent performance, practical problem solving, and leadership that stays close to the work. Vital earns trust through steady communication, accessible support, and reliable follow through across the supply chain.

- Asset based reliability
- Strong NY and NJ port presence
- HazMat certified operations
- Flexible capacity during peak seasons
- Professional drivers and dispatch
- Real time communication
- A human, relationship driven service model
- Comprehensive drayage, intermodal, OTR, LTL, and warehouse capabilities

Leadership

(I would want a picture on the left and the write up to start on the same line and have there be room more people to be added)

Mohamed Koura, Chief Executive Officer - Mr. Koura has been the CEO of Vital since 2011 after serving as an Operations Supervisor at JB Hunt. His background in large scale transportation and hands-on operations allows him to lead a nimble and adaptable company that responds to the needs of its customers. He is bilingual in Arabic and English, which strengthens communication across a diverse workforce and customer base.

Resources

(I want this page to be one for resources that prospects and customers can come to for information or tools, I found this successful at past stops for it keeps people coming back to the site. We will populate that at another time but I would like to add it)

Sustainability

(I want this page to serve as a central resource hub where prospects and customers can access information, tools, and updates that support more sustainable transportation decisions. It is important to have this on the website because it becomes a place people return to when they want credible guidance and practical insights. We also want to highlight the sustainability work taking place at our facilities and show how our operations align with responsible practices. Establishing this page now gives us a foundation to build on as we continue adding content over time.. Inbound Logistics magazine gives out a G75 award for sustainability. It is not hard to get on the list and serves as a key point for companies looking for sustainable solutions. This type of branding is becoming more and more prevalent I can assure after a survey submission we will be on the list and the badge can go on this page and other collateral.

Case studies

(I want this page to serve as a central resource hub where prospects and customers can access case studies, information, and tools that demonstrate how we solve problems and respond to customer needs. It is important to have this on the website because case studies show the real work behind the scenes and give people a reason to return for credible examples and practical insights. We also want to highlight what we are doing at our facilities and show how versatile and proactive we are in supporting our customers. Establishing this page now gives us a strong foundation to build on as we continue adding detailed case studies and supporting content over time).
